LOCALIZING URBAN FOOD STRATEGIES
Farming cities and performing rurality

The 7th Aesop Sustainable Food Planning Conference
Torino, on Thursday 8 – Friday 9 October 2015

Abstracts for scientific papers should be submitted only using the "Submit Abstract" on line form in this website.

Track 1. Spatial planning and urban design: the track focuses on the ways to include food in spatial planning and design practices, policies, services and research.

Track 2. Governance and private entrepreneurship: the track focuses on urban food governance on the multi-sectoral, multi-level and multi-actor characteristics of food system management.

Track 3. Relevant experiences and practices: the track focuses on new relationships among rural areas, cities, nature and agriculture, the consequent transformations of need, cultural sensitivities and life styles.

Track 4. Training and jobs: the track focuses on the various ways through which educational and training programmes deal with sustainable food planning, and how they prepare their target for future professional in this field.

Track 5. Flows and networks: the track focuses on relationship among cities, food production and environmental implications and how food, crossing flows and networks, can contribute to define the wealth of society and the quality of urban space.
